Simplicity made accessible.

Bringing everyone the possibility to smile, the **NUVO™** Implant System is designed to offer reliability based on proven concepts with simplicity, versatility while offering affordability.

ConicalFIT™

The **NUVO™ ConicalFIT™** features an internal conical connection in a naturally tapered body design maximizing treatment versatility and simplicity in all bone types. The **NUVO™** Implant System offers a comprehensive prosthetic portfolio covering all indications.

Proven

The **NUVO™ ConicalFIT™** combines proven concepts in dentistry: the tight sealed conical connection, titanium grade 4 commercially pure (CP) and the well documented sand blasted and acid etched surface treatment.

Conical Connection

NUVO™ ConicalFIT™ offers a secure fit between abutment and implant with a tapered 22 degrees connection, as well as featuring the platform-switching concept. It combines an anti-rotational engagement through an index allowing a proper abutment positioning.

Tapered Implant Design

NUVO™ Implant System features a bone level naturally tapered design, maximizing treatment options and efficiency regardless of the bone density.

Pure Titanium Grade 4

NUVO™ Implants are produced out from the most commercially pure and mechanically strong titanium grade 4 (Ti gr4 CP).

Sand Blasted & Acid Etched Surface

NUVO™ implants are treated with the well documented sandblasting and acid etched surface treatment, resulting from a highly controlled and validated process.

Simple

Simple as it should be, **NUVO™ ConicalFIT™** features simplified and precise prosthetic platforms, adding confidence on prosthetic handling, while offering a complete color-coded system, from bone bed preparation up to abutment selection. Adding confidence and accuracy with an intuitive and secure drill stop solution.

Simplified and Precise Prosthetic Platforms

The **NUVO™** internal conical connection, **ConicalFIT™**, is made even simpler, with 2 prosthetic platforms covering all demanding indication, and even safer by featuring differentiated internal threads designs to avoid platform mismatching on the abutment placement.

Color Coded System

The **NUVO™ ConicalFIT™** offers a fully color-coded system, which allows an intuitive product identification and selection, from drilling to implant placement and fixtures.

Intuitive and Secure drill stop solution

Facilitating the identification of the drill sequence, the diameter and length of the implant combined to a simple pick and drop mechanism, the **NUVO™** Drill Stop solution is designed to accuracy on drilling depth on the surgical procedures, with the possibility of multiple uses.

Affordable

The **NUVO™** implant system is dedicated to addressing the unique needs of the eco-challenger segment by making implantology accessible to all customers. Through the utilization of classic implant technologies and designs, aiming to democratize access to advanced dental solutions, empowering individuals to benefit from proven concepts in implantology.

Price Driven

NUVO™ is oriented for cost-sensitive customers, who place a strong emphasis on obtaining competitive pricing and securing lucrative high-volume contracts offering affordability.

Straightforward Implant Portfolio

NUVO™ Implants are designed for all indications, by offering a full range of diameters and lengths in a fair price.

Straightforward Prosthetic Portfolio

NUVO™ ConicalFIT™ offers a straightforward prosthetic portfolio designed to meet the patient's needed treatment:

- **Indication Type:** From single to edentulous;
- **Retention Type:** From screw to cement retained;
- **Workflow Type:** From conventional to digital.
